

## **Who is SEF?**

- A nonprofit corporation committed to achieving creative and academic excellence.
- Established by friends and supporters of Swallow School to generate support (financial and other resources) to enhance and enrich educational opportunities.
- Governed by a volunteer Board of Directors, which operates independently from the Swallow School Board. The SEF board develops guidelines for project funding, selects projects in collaboration with Swallow School administration, and raises and disperses funds for programs or projects.

## **How can I get involved?**

The most important part of the foundation is our volunteers. There are several ways to get involved and help. This includes anything from assisting in the library, to donating baked treats, to joining an event committee. There is an opportunity for everyone. Our biggest fundraisers this school year will include our annual 5K run, the Swallow school cookbook, and trivia night. Each event requires a chairperson or co-chairs and a large group of volunteers. Be on the lookout for a Signup Genius with more details about each opportunity.
